1.0 Housing Land Supply

1.1 Following publication of the updated Housing Land Availability Assessment, paragraph 9.2 of the Officer Report is amended as follows:

9.2 The most up to date assessment of housing land supply informed by the five-year housing land summary is included within the Housing Land Availability Assessment, November 2022. It identifies the total potential 5-year housing land supply in the borough at 4,008 additional dwellings, a total which includes delivery from sites yet to gain planning permission. This represents a shortfall against the Local Plan requirement or approximately a 3-year supply of housing land. It is important to note that this assessment of five-year land supply includes over 1,000 homes at proposed housing allocations within the Local Plan (2017). The potential housing land supply from this proposal is not included in this assessment. The proposed dwellings will make a small contribution towards the borough achieving a five-year housing land supply.
