

Item No: 4
Application No: 21/01341/FUL
Date valid: 21 May 2021
Target decision date: 20 August 2021
Author: Maxine Ingram
☎: 0191 643 6322
Ward: Killingworth

Application type: full planning application

Location: Henson Motor Group, Benton Square Industrial Estate, Whitley Road, Benton, NEWCASTLE UPON TYNE

Proposal: Demolition of existing building and erection of a building for use as a builders' merchant. (storage, distribution, trade counter, offices and ancillary retail sales)

Applicant: c/o Agent, Lichfields St. Nicholas Building St. Nicholas Street
Newcastle Upon Tyne NE1 1RF

Agent: Lichfields, Mr Michael Hepburn St Nicholas Building St Nicholas Street
Newcastle NE1 1RF

RECOMMENDATION: Minded to grant on expiry consultation

INFORMATION

1.0 Summary Of Key Issues & Conclusions

1.0 The main issues for Members to consider in this case are:

- The principle of the development,
- The impact on amenity,
- The impact on character and appearance,
- The impact on highway safety, and,
- Other issues.

1.1 Planning law requires that applications for planning permission must be determined in accordance with the development plan, unless material considerations indicate otherwise. Members need to consider whether this application accords with the development plan and also take into account any other material considerations in reaching their decision.

2.0 Description of the Site

2.1 The application site is currently in use as a car dealership on the North Tyne Industrial Estate, which is an allocated site (Site E016) for employment uses in the Local Plan (LP) (2017). The site is on the eastern perimeter of the site. To the north east it is bound by an electricity substation, beyond which lies a residential estate (Miller Close). To the north it is bound by a residential estate (Miller Close) and existing commercial uses. To the west it is bound by existing commercial

uses. The A191 (Whitley Road) is located to the south of the site, beyond which lies a supermarket.

2.2 Access to the site is from the A191.

3.0 Description of the Proposed Development

3.1 Planning permission is sought for the demolition of existing building and erection of a building for use as a builders' merchant. (storage, distribution, trade counter, offices and ancillary retail sales).

3.2 The applicant has advised the proposed building will operate as a builders merchants. The existing operator (car dealership) will be relocated to a different part of the north east.

3.3 The ground floor of the building is in two parts. The main part will be a full height warehouse, with the smaller part to be used for smaller products as well as offices. The roof will provide a mezzanine floor which will be used for storage.

3.4 The proposed development will support the creation of up to 30 jobs directly on-site.

3.5 It is proposed that staff will arrive for work at 06:30 hours, with the business opening at 07:00 hours. The premises will close at 18:00 hours Monday to Friday and 17:00 hours on Saturdays. At present it is not intended to open on Sundays.

4.0 Relevant Planning History

87/00057/ADV - Advert signs – Permitted 11.03.1987

95/01306/FUL - Improvements to existing buildings and provision of car parking areas – Permitted 31.10.1995

96/00760/FUL - Change of use from roofing contractors depot (part) to car sales showroom and related parking, together with the demolition of frontage offices and creation of new front elevation – Permitted 15.07.1996

05/00420/FUL - Demolition of existing structure. Rationalisation and provision of new car retail space. Provision of new/relocation of existing fencing. Provision of floodlighting – Permitted 20.04.2005

08/00210/FUL - External works to include new windows, principal entrance way and re-cladding to the front and right side elevations – Permitted 14.04.2008

5.0 Development Plan

5.1 North Tyneside Local Plan (2017)

6.0 Government Policies

6.1 National Planning Policy Framework (NPPF) (July 2021)

6.2 National Planning Practice Guidance (NPPG) (As amended)

6.3 Planning applications must be determined in accordance with the development plan unless material considerations indicate otherwise. The NPPF is a material consideration in the determination of all applications. It requires Local Planning Authorities (LPAs) to apply a presumption in favour of sustainable development in determining development proposals. Due weight should still be attached to Development Plan policies according to the degree to which any policy is consistent with the NPPF.

PLANNING OFFICERS REPORT

7.0 Detailed Planning Considerations

7.1 The main issues for Members to consider in this case are:

- The principle of the development,
- The impact on amenity,
- The impact on character and appearance,
- The impact on highway safety, and,
- Other issues.

7.2 Consultations responses and representations received as a result of the publicity given to this application are set out in the appendix to this report.

8.0 Principle of the development

8.1 The Local Plan (LP) was adopted in July 2017 to guide development in the period up to 2032. The council acknowledges that the policies contained within the LP predate the publication of the revised NPPF however, it is clear from paragraph 219 of the NPPF that: "However, existing policies should not be considered out-of-date simply because they were adopted or made prior to the publication of this Framework. Due weight should be given to them, according to their degree of consistency with this Framework (the closer the policies in the plan to the policies in the Framework, the greater the weight that may be given)." The council considers that the local plan policies set out in this report are consistent with the NPPF and can be afforded significant weight.

8.2 The NPPF makes it clear that the purpose of the planning system is to contribute to the achievement of sustainable development. Achieving sustainable development means that the planning system has three overarching objectives: an economic objective; a social objective; and an environmental objective. Planning policies and decisions should play an active role in guiding development towards sustainable solutions, but in doing so should take local circumstances into account, to reflect the character, needs and opportunities of each area.

8.3 The NPPF paragraph 11 makes it clear that plans and decisions should apply a presumption in favour of sustainable development. However, the presumption in favour of sustainable development does not change the statutory status of the development plan as the starting point for decision making. The NPPF paragraph 12 states "Where a planning application conflicts with an up-to-date development plan permission should not normally be granted. Local Planning Authorities (LPA's) may take decisions that depart from an up-to-date development plan, but only if material considerations in a particular case indicate that the plan should not be followed".

8.4 LP Policy S2.2 'Provision of Land for Employment Development' seeks to ensure an attractive and flexible supply of employment land is available to deliver the Council's strategy for economic prosperity, job growth and investment over the plan period.

8.5 LP Policy DM2.3 Development Affecting Employment Land and Buildings states "The Council will support proposals on employment land, as shown on the Policies Map, for new or additional development for uses within use classes B1, B2 or B8 or that which is deemed ancillary.

Proposals on identified employment land or other buildings in use-class B1, B2 or B8, for uses that could conflict with the development and regeneration of sites for economic development, will be permitted where these proposals would not:

- a. Result in the unacceptable loss of operating businesses and jobs; and,
- b. Result in an excessive reduction in the supply of land for development for employment uses, taking into account the overall amount, range, and choice available for the remainder of the plan period; and,
- c. Have an adverse impact upon the amenity and operation of neighbouring properties and businesses."

8.6 The site is currently in use as a car dealership (sui generis use) on the North Tyne Industrial Estate, which is an allocated site (Site E016) for employment uses in Policy S2.2 of the North Tyneside Council Local Plan (2017).

8.7 Policy S2.2 of the Local Plan defines employment uses as those in the former use class of B1 (now part of the wider definition of the E Class) and the extant use class B2 and B8. The proposed use of the site for storage and distribution purposes would be defined as a B8 use class. The applicant has advised within their supporting documents that a small element of the proposal will include sales to the general public, which would be classed as general retail (Use Class E), but the majority of the operator's business is for wholesale purposes.

8.8 Policy DM 2.3 of the Local Plan aims to support proposals for B8 uses on employment sites, but it does also allow for uses not within the use classes of B1 (now Use Class E), B2 or B8 if the use is ancillary. Based on the information provided, it is considered that the sales to members of the public will be ancillary and therefore the proposed development would be in accordance with Policy DM2.3 of the Local Plan. A condition is recommended to ensure that the overall floor area for the ancillary retail does not exceed 10% of the overall floor area.

8.9 The proposed development would support economic prosperity and job growth in the Borough supporting Policy S2.1 of the Local Plan and would be supporting business investment of a nature congruent to the allocated employment site.

8.10 The proposed development meets the requirements of Policies S2.2 and DM2.3. Members need to determine whether the principle of the proposed development is acceptable. It is the view of officers that the principle of the proposed development is considered to be acceptable, subject to all other material considerations set out below being addressed.

9.0 Impact on amenity

9.1 Paragraph 185 of the NPPF states “Planning policies and decisions should also ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on health, living conditions and the natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should: a) mitigate and reduce to a minimum potential adverse impacts resulting from noise from new development – and avoid noise giving rise to significant adverse impacts on health and the quality of life; b) identify and protect tranquil areas which have remained relatively undisturbed by noise and are prized for their recreational amenity value for this reason; and c) limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation”.

9.2 LP Policy S1.4 “General Development Principles” states “ Proposals for development will be considered favourably where it can be demonstrated that they would accord with the strategic, development management or area specific policies of this Plan.” Amongst other matters this includes: be acceptable in terms of their impact upon local amenity for new or existing residents and businesses, adjoining premises and land uses; and be accommodated by, and make best use of, existing facilities and infrastructure, particularly in encouraging accessibility and walking, cycling and public transport, whilst making appropriate provision for new or additional infrastructure requirements”.

9.3 LP Policy DM5.19 Pollution states “Development proposals that may cause pollution either individually or cumulatively of water, air or soil through noise, smell, smoke, fumes, gases, steam, dust, vibration, light, and other pollutants will be required to incorporate measures to prevent or reduce their pollution so as not to cause nuisance or unacceptable impacts on the environment, to people and to biodiversity.

Development proposed where pollution levels are unacceptable will not be permitted unless it is possible for mitigation measures to be introduced to secure a satisfactory living or working environment.

Development that may be sensitive (such as housing, schools and hospitals) to existing or potentially polluting sources will not be sited in proximity to such sources. Potentially polluting development will not be sited near to sensitive areas unless satisfactory mitigation measures can be demonstrated.

Proposals for development should have regard to the noise impacts arising from the Newcastle International Airport flight path as shown on the Policies Map.”

9.4 The Manager for Environmental Health has been consulted. She has raised concerns with regards to noise arising from the new development (delivery and collections at the site, storage operations and noise from any external plant and equipment installed at the site) and the impacts this may have on the residential properties at Miller Close. The closest property is some 12m from the north west boundary.

9.5 The Manager for Environment Health has reviewed the noise assessment report. This has considered noise arising from deliveries only with two points sources for the modelling located near the entrance of the delivery yard. The noise monitoring has determined that noise arising from deliveries will give rise to low to minor adverse impacts for neighbouring residents. The noise assessment has not considered activities within the storage area adjacent to No. 37 Miller Close. It is noted that a 2.6m high existing fence is provided but storage racking within this area will be up to 5m high. Operational activities within this area may give rise to potential disturbance. The proposed site layout also shows that vehicle movements will take place in this area. These vehicle movements will generate noise that would be similar to that of the existing site operations. However, the noise assessment indicates that the main noise generating activities will arise from the loading and unloading of deliveries which will occur nearer to the entrance of the yard. The noise levels are not considered to give rise to significant adverse impacts. Internal noise levels within bedrooms at the first-floor will meet the World Health Organisation guidelines.

9.6 The NPPF, paragraph 55 states “Local Planning Authorities should consider whether otherwise unacceptable development could be made acceptable through the use of conditions or planning obligations.” Paragraph 56 states “Planning conditions should be kept to a minimum and only imposed where they are necessary, relevant to planning and to the development to be permitted, enforceable, precise and reasonable in all other respects.” Although concerns have been raised by the Manager of Environmental Health, Members are advised that it is clear from their comments set out in paragraphs 1.7-1.9 of the appendix to this report that appropriate mitigation to reduce the impacts arising from noise can be secured by conditions.

9.7 Members need to determine whether the proposed development is acceptable in terms of its impact on the amenity of neighbouring and nearby properties. It is officer advice that the proposed development is, subject to the imposition of the suggested conditions. As such, it is officer advice that the proposed development accords with the advice in paragraph 185 of the NPPF and LP policies DM5.19 and DM6.1.

10.0 Impact on character and appearance

10.1 Paragraph 134 of the NPPF states that development that is not well designed should be refused.

10.2 LP Policy DM6.1 ‘Design of Development’ makes it clear that applications will only be permitted where they demonstrate high and consistent design standards. Amongst other matters proposed developments are responsive to their location, including topography, wildlife habitats, site orientation and existing buildings; ensuring a positive relationship to neighbouring buildings and spaces; ensuring sufficient parking is well integrated into the layout; and a good standard of amenity for existing and future residents.

10.3 LDD11 ‘Design Quality’ SPD applies to all planning applications that involve building works.

10.4 The overall scale and design of buildings vary within the wider industrial estate.

10.5 The proposed building will be approximately 8.1m to ridge. This height is considered to be commensurate to the buildings located on the wider industrial estate and the footprint is in-keeping with the scale of the local area. The proposed materials (composite cladding and brick) are considered to be appropriate.

10.6 New 2.4m high Nylofor high security powder coated fencing is to be installed to the south of the site. To the remaining boundary, the existing fencing is to be retained. The use of Nylofor fencing to the southern boundary is appropriate as it maintains security whilst still allowing views into the site. The use of this type of fencing accords with the advice set out in the Design Quality SPD.

10.7 The applicant has advised that many of the goods supplied by a builder's merchant will be permanently exposed to the elements. Therefore, there is no practical need for them to be stored under cover. The open storage area which also serves as an HGV parking area, circulation space and delivery area is the larger part of the site. Some materials such as timber and lintels are stored in specialist racking. These will be 5m high. Other materials such as brick can be stacked on top of each other.

10.8 The applicant has advised that the yard area will be laid out to enable easy access to all goods and to ensure the health and safety of all staff and customers is not compromised.

10.9 Nos. 36 and 37 Miller Close are sited in close proximity to the north west boundary. There are no habitable windows sited in the gables of these properties. Obscure views of the proposed external storage areas will be afforded from these properties, including No. 31 Miller Close, and more direct views will be afforded from their rear gardens. However, it is not considered that their residential amenity will be significantly affected to such an extent that will sustain a recommendation of refusal.

10.10 The site is currently hard surfaced with no existing landscape features.

10.11 Members need to consider whether the impact on the character and appearance of the immediate surrounding area is acceptable. It is officer advice that, the proposed development would not result in a significant visual impact on the character or appearance of the immediate surrounding area. As such, the proposed development accords with national and local planning policies.

11.0 Impact on highway safety

11.1 The NPPF paragraph 111 makes it clear that development should only be prevented or refused on highway grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.

11.2 The NPPF paragraph 112 states, amongst other matters, that applications for development should give priority first to pedestrian and cycle movements both

within the scheme and with neighbouring areas and address the needs of people with disabilities and reduced mobility in relation to all modes of transport.

11.3 LP Policy DM7.4 'New Development and Transport' makes it clear that the Council will ensure that the transport requirements of new development, commensurate to the scale and type of development, are taken into account and seek to promote sustainable travel to minimise environmental impacts and support resident's health and well-being.

11.4 The Council's maximum parking standards are set out in the Transport and Highways SPD (LDD12).

11.5 The site will be accessed from the A191 (Whitley Road) as per the existing arrangement. Parking provision will be provided within the site.

11.6 The Highways Network Manager has been consulted. He has reviewed the submitted Transport Statement (TS). He has advised that the impact on the adjacent highway network will not be severe. He has also advised that the site has good links with public transport and parking and cycle parking have been provided to meet the needs of the site. On this basis, he has recommended conditional approval.

11.7 Members need to determine whether the proposed development is acceptable in terms of its impact on the highway network and existing parking provision. It is officer advice that it is. The proposed development accords with both national and local planning policies.

12.0 Other Issues

12.1 Contaminated Land

12.2 NPPF paragraph 183 seeks to ensure that planning decisions have regard to ground conditions and any risks arising from land instability and contamination.

12.3 NPPF paragraph 184 states "Where a site is affected by contamination or land stability issues, responsibility for securing a safe development rests with the developer and/or landowner".

12.4 LP Policy DM5.18 "Contaminated and Unstable Land" seeks to ensure that the future users or occupiers of a development would not be affected by contamination or stability issues.

12.5 The Contaminated Land Officer has been consulted. She has recommended conditional approval.

12.6 Members need to consider whether the proposed development is acceptable in terms of its impact on ground conditions. It is officer advice that it is.

12.8 Flooding

12.9 The NPPF paragraph 159 makes it clear that development should not increase flood risk elsewhere and only consider development in appropriate areas.

12.10 LP Policy “DM5.12 Development and Flood Risk” states that all major developments will be required to demonstrate that flood risk does not increase as a result of the development proposed, and that options have been taken to reduce overall flood risk from all sources, taking into account the impact of climate change over its lifetime.

12.11 The submitted Drainage Strategy advises that the replacement building will utilise the existing drainage infrastructure on site for both foul and surface water systems. A CCTV survey has been undertaken which shows that the conditions of the existing drains would be able to support the proposed development.

12.12 Members need to determine whether the proposed development is acceptable in terms of flood risk. It is officer advice that it is and it would accord with both national and local planning policies.

12.13 Minerals

12.14 LP DM5.17 ‘Minerals’ sets out guidance on minerals extraction. However, this development relates to an existing largely hard surfaced site.

12.15 Aviation

12.16 Newcastle International Airport Limited (NIAL) have been consulted. They have raised no objection to the proposed development.

12.17 Police

12.18 Northumbria Police have been consulted. They have raised no objection to the proposed development. They have provided comments regarding site security. Informatives are suggested to advise the applicant of their comments.

12.19 Archaeology

12.20 The Tyne and Wear Archaeology Officer has been consulted. She has raised no objections to the proposed development.

13.0 Local Financial Considerations

13.1 Local financial considerations are defined as a grant or other financial assistance that has been, that will or that could be provided to a relevant authority by the Minister of the Crown (such as New Homes Bonus payments) or sums that a relevant authority has received, or will or could receive in payment of the Community Infrastructure Levy (CIL). The proposal is CIL liable and therefore Members need to take this into account as part of their decision.

14.0 Conclusion

14.1 Members need to determine whether the proposed development is acceptable in terms of the principle of the development, its impact on amenity, its impact on the character and appearance of the area and all other issues including its impact on highways and ground conditions. It is the view of officers that the proposed development is acceptable. As such, officers consider that the proposed development does accord with national and local planning policies. Approval is recommended.

RECOMMENDATION: Minded to grant on expiry consultation

It is recommended that members indicate they are minded to approve the application, following expiry of the consultation, and subject to the conditions set out below and the addition or omission of any other considered necessary, and grant plenary powers to the Head of Environment, Housing and Leisure to determine the application providing no further matters arise which in the opinion of the Head of Environment, Housing and Leisure, raise issues not previously considered which justify reconsideration by the Committee.

Conditions/Reasons

1. The development to which the permission relates shall be carried out in complete accordance with the following approved plans and specifications:
 - Location plan
 - Proposed roof plan Dwg No. NEB BC 007A
 - Proposed layout plan Dwg No. NEB BC 003A Rev A
 - Proposed site layout plan Dwg No. NEB BC 001 A Rev A
 - Proposed elevations Dwg No. NEB BC 004A Rev AReason: To ensure that the development as carried out does not vary from the approved plans.

2. The development hereby permitted shall be begun before the expiration of three years from the date of this permission.
 - Reason: To comply with the requirements of Section 91 of the Town and Country Planning Act 1990.

3. The development hereby permitted shall not be constructed above damp proof course level until the details of a scheme of site investigation and assessment to test for the presence and likelihood of gas emissions from underground workings, historic landfill, unknown filled ground or made ground has been submitted to and agreed in writing by the Local Planning Authority.

Upon approval of the method statement:

a) A detailed site investigation should be carried out to establish the degree and nature of the gas regime, and whether there is a risk likely to arise to the occupants of the development. The results and conclusions of the detailed site investigations should be submitted to and the conclusions approved in writing by the Local Planning Authority. The Ground Gas Assessment Report should be written using the current government guidelines.

b) In the event that remediation is required following the assessment of the ground gas regime using current guidelines, then a method statement must be submitted to and approved in writing by the Local Planning Authority.

The detailed design and construction of the development shall take account of the results of the site investigation and the assessment should give regard to

results showing depleted oxygen levels or flooded monitoring wells. The method of construction shall also incorporate all the measures shown in the approved assessment.

This should provide details of exactly what remediation is required and how the remediation will be implemented on site; details including drawings of gas protection scheme should be included.

c) Where remediation is carried out on the site then a validation report will be required. This report should confirm exactly what remediation has been carried out and that the objectives of the remediation statement have been met.

The validation report should include cross sectional diagrams of the foundations and how any gas protection measures proposed in the remediation method statement are incorporated. In the event that integrity testing of membranes is required then any test certificates produced should also be included.

A verification report shall be submitted to and approved in writing by the Local Planning Authority before the development is occupied/brought into use.

d) In the event that there is a significant change to the ground conditions due to the development, for example grouting or significant areas of hard standing; then additional gas monitoring should be carried out to assess whether the gas regime has been affected by the works carried out. In the event that the gas regime has been altered then a reassessment of remediation options shall be submitted to the Local Planning authority to be agreed in writing before the development is occupied/brought into use.

Thereafter the development shall not be implemented otherwise than in accordance with the scheme referred to in c) above.

Reason: In order to safeguard the development and/or the occupants thereof from possible future gas emissions from underground and or adverse effects of landfill gas which may migrate from a former landfill site having regard to policy DM5.18 of the North Tyneside Local Plan (2017) and National Planning Policy Framework.

4. Any spoil arising from foundations will require Waste Acceptance Criteria testing carried out to ensure that it is disposed of at a suitably licensed facility.

Reason: To ensure all materials are disposed of correctly having regard to policy DM5.18 of the North Tyneside Local Plan (2017) and National Planning Policy Framework.

5. Notwithstanding condition 1, prior to the commencement of the development hereby approved above ground level details of the height, position, design and materials of any chimney or extraction vent to be provided in connection with the development shall be submitted to and approved in writing by the Local Planning Authority. The scheme shall thereafter be implemented before any unit is first occupied in accordance with the approved details and permanently retained.

Reason: In order to safeguard the amenities of adjoining properties having regard to policy DM5.19 of the North Tyneside Local Plan (2017).

6. Notwithstanding condition 1, prior to the commencement of the development hereby approved above ground level details of any air ventilation systems shall be submitted to and approved in writing by the Local Planning Authority. The scheme shall thereafter be implemented before any unit is first occupied in accordance with the approved details and permanently retained.

Reason: In order to safeguard the amenities of adjoining properties having regard to policy DM5.19 of the North Tyneside Local Plan (2017).

7. Notwithstanding condition 1, prior to the commencement of the development hereby approved above ground level a noise scheme shall be submitted to and approved in writing by the Local Planning Authority, in accordance with BS4142 to determine the noise rating level of any new external plant and equipment operating at the site, including noise levels expected to be created by their combined use, and appropriate mitigation measures taken where necessary to ensure the rating level of plant and equipment does not exceed the existing daytime background noise level of 46 dB LA90 at Miller Close. Thereafter the development shall be carried out in accordance with these agreed details and verification details pursuant to condition 8.

Reason: In order to safeguard the amenities of adjoining properties having regard to policy DM5.19 of the North Tyneside Local Plan (2017).

8. Within one month of the installation of any plant and equipment acoustic testing shall be undertaken to verify compliance with condition 7. These details shall be submitted to and approved in writing by the LPA prior to the operation of the plant and equipment being brought into permanent use. Thereafter the plant and equipment shall be operated and maintained in full working order.

Reason: In order to safeguard the amenities of adjoining properties having regard to policy DM5.19 of the North Tyneside Local Plan (2017).

9. No sound reproduction equipment which is audible outside the curtilage of the premises shall be operated on the site.

Reason: In order to protect the amenities of occupiers of nearby properties having regard to policy DM5.19 of the North Tyneside Local Plan (2017).

10. The premises shall only be open for business between the hours of 07:00 and 18:00 Monday to Friday and 07:00 - 17:00 on Saturdays. The premises shall not be open on any Sunday.

Reason: To safeguard the occupiers of adjacent properties from undue noise of other associated disturbance having regard to policy DM5.19 of the North Tyneside Local Plan (2017).

11. Prior to installation of any floodlighting or other form of external lighting, a lighting scheme shall be submitted to and approved in writing by the Local Planning Authority. This shall include the following information:

- a statement of frequency of use, and the hours of illumination;

- a site plan showing the area to be lit relative to the surrounding area, indicating parking or access arrangements where appropriate, and highlighting any significant existing or proposed landscape or boundary features;
- details of the number, location and height of the proposed lighting columns or other fixtures;
- the type, number, mounting height and alignment of the luminaires;
- the beam angles and upward waste light ratio for each light;
- an isolux diagram showing the predicted illuminance levels at critical locations on the boundary of the site and where the site abuts residential properties or the public highway to ensure compliance with the institute of lighting engineers Guidance Notes for the reduction of light pollution to prevent light glare and intrusive light for agreed environmental zone ; and
- where necessary, the percentage increase in luminance and the predicted illuminance in the vertical plane (in lux) at key points.

The lighting shall be installed and maintained in accordance with the approved scheme.

Reason: In the interest of visual amenity and/or highway safety having regard to policy DM5.19 of the North Tyneside Local Plan (2017).

12. The construction site subject of this approval shall not be operational and there shall be no construction, deliveries to, from or vehicle movements within the site outside the hours of 0800-1800 Monday - Friday and 0800-1400 Saturdays with no working on Sundays or Bank Holidays.

Reason: To safeguard the amenity of nearby residents having regard to policy DM5.19 of the North Tyneside Local Plan (2017) and National Planning Policy Framework.

13. There shall be no demolition activity or vehicle movements to, from or within the site outside the hours of 0800-1800 Monday to Friday, 0800-1400 Saturday with no working on Sundays or Bank Holidays.

Reason: To safeguard the amenities of neighbouring residents having regard to policy DM5.19 of the North Tyneside Local Plan (2017) and National Planning Policy Framework.

14. There shall be no burning of any materials on the site at any time.

Reason: To safeguard the amenities of neighbouring occupants and land having regard to policy DM5.19 of the North Tyneside Local Plan (2017) and National Planning Policy Framework.

15. Storage of any dust generating building materials at the yard must be suitably covered to minimise dusts offsite.

Reason: To safeguard the amenities of neighbouring occupants and land having regard to policy DM5.19 of the North Tyneside Local Plan (2017) and National Planning Policy Framework.

16. Deliveries and collections must not be permitted between the hours 23:00 and 07:00 hours Monday to Saturdays. There shall be no deliveries or collections to the premises on any Sunday.

Reason: To safeguard the amenities of neighbouring occupants and land having regard to policy DM5.19 of the North Tyneside Local Plan (2017) and National Planning Policy Framework.

17. No development shall commence until a Construction Method Statement for the duration of the construction period has been submitted to and approved in writing by the Local Planning Authority. The approved statement shall: identify the access to the site for all site operatives (including those delivering materials) and visitors, provide for the parking of vehicles of site operatives and visitors; details of the site compound for the storage of plant (silos etc) and materials used in constructing the development; provide a scheme indicating the route for heavy construction vehicles to and from the site; a turning area within the site for delivery vehicles; dust suppression scheme (such measures shall include mechanical street cleaning, and/or provision of water bowsers, and/or wheel washing and/or road cleaning facilities, and any other wheel cleaning solutions and dust suppressions measures considered appropriate to the size of the development). The scheme must include a site plan illustrating the location of facilities and any alternative locations during all stages of development. The approved statement shall be implemented and complied with during and for the life of the works associated with the development.

Reason: This information is required pre development to ensure that the site set up does not impact on highway safety, pedestrian safety, retained trees (where necessary) and residential amenity having regard to policies DM5.19 and DM7.4 of the North Tyneside Local Plan (2017) and National Planning Policy Framework.

18. Notwithstanding Condition 1, prior to the commencement of any part of the development hereby approved above ground level details of facilities to be provided for the storage of wheeled refuse, including recycling if necessary, shall be submitted to and approved in writing by the Local Planning Authority. The refuse facilities shall be provided in accordance with the approved details, prior to the occupation of each unit and thereafter permanently retained.

Reason: In order to safeguard the amenities of the area having regard to policies DM6.1 of North Tyneside Local Plan (2017).

19. The scheme for parking and manoeuvring indicated on the approved plans shall be laid out prior to the initial occupation of the development hereby permitted and these areas shall not thereafter be used for any other purpose.

Reason: To enable vehicles to draw off, park and turn clear of the highway to minimise danger, obstruction and inconvenience to users of the adjoining highway having regard to policy DM7.4 of the North Tyneside Local Plan (2017).

20. No part of the development shall be occupied until a scheme for the provision of secure undercover cycle parking has been submitted to and approved by in writing the Local Planning Authority. Thereafter, this scheme shall be implemented in accordance with the approved details before the development is occupied.

Reason: In the interests of highway safety having regard to Policy DM7.4 of the North Tyneside Local Plan (2017).

21. No part of the development shall be occupied until an area has been laid out within the site for heavy goods vehicles to turn in accordance with the approved drawing and that area shall not thereafter be used for any other purpose.

Reason: To enable vehicles to draw off and turn clear of the highway thereby avoiding the need to reverse onto the public highway having regard to policy DM7.4 of the North Tyneside Local Plan (2017).

22. Notwithstanding the provisions of the Town and Country Planning (Use Classes) Order 1987 (or any Order revoking or re-enacting that Order), the development hereby approved shall only be used only for the purposes applied for:

-B8 Storage and Distribution (this includes open air storage, and which, for the avoidance of doubt includes the builder's merchant use described in the submitted application) including no more than 10% of the floorspace of the building hereby approved to be used for the small product store, and shall not be used for any other purpose within the Town and Country Planning (Use Classes) Order 1987 (or any Order revoking or re-enacting that Order).

Reason: To enable the Local Planning Authority to retain control over the use in a designated employment site having regard to Policy DM2.3 of the North Tyneside Local Plan (2017).

23. External products shall only be stored in the areas identified on the proposed site layout plan (Dwg No. NEB BC 001 A). All stacked products shall not exceed a height of four metres, all pallet or cantilever racking shall not exceed a height of five metres and all other products stored outside shall not exceed a height of four metres unless first agreed in writing by the Local Planning Authority. Reason: To safeguard the amenities of neighbouring occupants and land having regard to policy DM5.19 of the North Tyneside Local Plan (2017) and National Planning Policy Framework.

24. Notwithstanding Condition 1, prior to the commencement of any construction works on the site details showing the existing and proposed ground levels and levels of thresholds and floor levels of the proposed new build and the existing levels of the adjacent footpath shall be submitted to and approved in writing by the Local Planning Authority. Such levels shall be shown in relation to a fixed and known datum point. Thereafter, the development shall not be carried out other than in accordance with the approved details.

Reason: This information is required pre-commencement to ensure that the work is carried out at suitable levels in relation to adjoining properties and highways, having regard to amenity, access, highway and drainage requirements and protecting existing landscape features having regard to the NPPF and policy DM6.1 of the North Tyneside Local Plan (2017).

25. Prior to construction above damp proof course the details specifying how the applicant intends to offer opportunities to local unemployed people during the construction phase shall be submitted to and agreed in writing by the Local Planning Authority. Thereafter, it shall be implemented in accordance with the agreed details.

Reason: To enable the Council to put forward local eligible unemployed people with a view to securing work and training opportunities to encourage employment in accordance with policy S2.1 of the North Tyneside Local Plan (2017).

Statement under Article 35 of the Town & Country (Development Management Procedure) (England) Order 2015):

The proposal complies with the development plan and would improve the economic, social and environmental conditions of the area. It therefore comprises sustainable development and the Local Planning Authority worked proactively and positively to issue the decision without delay. The Local Planning Authority has therefore implemented the requirements in Paragraph 38 of the National Planning Policy Framework.

Northumbria Police have advised that builders merchants can be a target for theft, as generally once the store is closed there is limited informal surveillance as per the proposed site layout plan, products are left in situ outside and often placed up against the fence line making them an easy target for theft. From the proposed site layout out, there are a number of pallet and cantilever racking systems, these should be located away from the perimeter fence which would

deter and help prevent them being used as a climbing aid and the products being an easy target for theft. A general security plan should be developed and adopted for the site, to include external lighting, comprehensive CCTV and overall site security operating procedures, such as gate security and general maintenance of the site to include regular checks of the boundary fence.

Application reference: 21/01341/FUL

Location: Henson Motor Group, Benton Square Industrial Estate, Whitley Road, Benton

Proposal: Demolition of existing building and erection of a building for use as a builders' merchant. (storage, distribution, trade counter, offices and ancillary retail sales)

Not to scale

Consultations/representations

1.0 Internal Consultees

1.1 Highways Network Manager

1.2 A Transport Statement (TS) was submitted as part of the application and it is considered that the impact on the adjacent highway network will not be severe. The site has good links with public transport, parking & cycle parking have been provided to meet the needs of the site and conditional approval is recommended.

1.3 Recommendation - Conditional Approval

1.4 Conditions:

ACC25 - Turning Areas: Before Occ

PAR04 - Veh: Parking, Garaging before Occ

REF01 - Refuse Storage: Detail, Provide Before Occ

SIT06 - Construction Method Statement (Minor)

No part of the development shall be occupied until details of secure & undercover cycle parking provision has been submitted to and approved by in writing the Local Planning Authority. This will be implemented in accordance with the approved details and retained thereafter

Reason: To accord with Central Government and Council Policy concerning sustainable transport.

1.5 Informatives:

I10 - No Doors/Gates to Project over Highways

I13 - Don't obstruct Highway, Build Materials

I45 - Street Naming & Numbering

I46 - Highway Inspection before dv/pt

1.6 Manager for Environmental Health (Pollution)

1.7 The premises are located on a dedicated industrial estate but are adjacent to residential properties at Miller Close, with the facade of the nearest property located some 12 metres from the north west boundary. I have concerns with regard to noise arising from the new development, specifically noise arising from delivery and collections at the site, storage operations and noise from any external plant and equipment installed at the site.

1.8 I have reviewed the noise assessment report. This has considered noise arising from deliveries only with two point sources for the modelling located near the entrance of the delivery yard. The noise monitoring has determined that noise arising from deliveries will give rise to low to minor adverse impacts for neighbouring residents. However, the noise assessment has not considered activities within the storage area adjacent to 37 Miller Close. A 2.6m high existing fence is provided but storage racking within this area will be up to 5 m high and operational activities within this area may give rise to potential disturbance from clattering and banging when loading and unloading building

materials from the racking. The site layout plan also shows that vehicle movements will take place within this area but such noise would be similar to that of the existing site which consists of vehicle storage. However, the noise assessment indicates that the main noise generating activities will arise from the loading and unloading of deliveries which will occur nearer to the entrance of the yard. The noise rating level calculated from the operating was determined as 46 dBLAeq against an existing background of 46 dBLA90. Although identified as minor adverse, noise levels are not considered to give rise to significant adverse impacts. Internal noise levels within bedrooms at the first floor were calculated as 35 dBLAeq, and would meet the World Health Organisation guidelines for community noise for internal bedrooms during the daytime period.

1.9 I would therefore recommend the following conditions if planning consent is to be given:

Installation of New External Plant and Equipment:

A noise scheme must be submitted in accordance with BS4142 to determine the noise rating level of new external plant and equipment operating at the site and that appropriate mitigation measures are taken where necessary to ensure the rating level of the plant and equipment does not exceed the existing daytime background noise level of 46 dB LA90 at Miller Close. It will be necessary following installation of the plant and equipment that acoustic testing is undertaken to verify compliance with this condition within one month of its installation and submitted for written approval prior to the operation of the plant and thereafter maintain in working order.

NO104 this will include details of the noise levels expected to be created by the combined use of external plant and equipment to ensure compliance with the noise rating level.

There shall be no burning of materials on the site.

Reason: In the interests of protecting the amenities of the occupiers of surrounding land and properties.

Storage of any dust generating building materials at the yard must be suitably covered to minimise dusts offsite.

Deliveries and collections must not be permitted between the hours 23:00 and 07:00 hours Monday to Saturdays.

LIG01 for any new external lighting

1.10 Manager for Environmental Health (Contaminated Land)

1.11 The site lies c. 100m south of a former mine, and lies c250m north of three known landfills. The Design and Access Statement indicates that

"The existing overlying structures will be demolished as part of the scheme. The existing building is dated, and the current layout is not suitable for the proposed use. The existing hardstanding will be retained and repaired where required."

1.12 If this is the case then a full site investigation will not be required as there will be no pathways for contamination and therefore no contaminant linkage. However, any spoil arising from foundations will require Waste Acceptance Criteria testing carried out to ensure that it is disposed of at a suitably licensed facility.

1.13 Due to the close proximity of potential landfill and mine gas sources an investigation into the ground gas regime will be required. Recommend conditional approval

1.14 Condition:
Gas 006

1.15 Planning Policy

1.16 The site is currently trading as a car sales area (sui generis use) on the North Tyne Industrial Estate, which is an allocated site (Site E016) for employment uses in Policy S2.2 of the North Tyneside Council Local Plan (2017). The site is on the eastern perimeter of the industrial estate with an electrical substation to the east, housing to the north, a supermarket to the south and further industrial development to the west. The site is in a prominent location of the industrial estate, fronting the A191, which is a key link road running west to east across the Borough.

1.17 Policy S2.2 of the Local Plan defines employment uses as those in the former use class of B1 (now part of the wider definition of the E Class) and the extant use class B2 and B8. The proposed use of the site for storage and distribution purposes would be defined as a B8 use class. The facility will include sales to the general public, which would be classed as general retail (Use class E), but the majority of the operator's business is for wholesale purposes.

1.18 Policy DM 2.3 of the Local Plan aims to support proposals for B8 uses on employment sites, but it does also allow for uses not within the use classes of B1, B2 or B8 if the use is ancillary. In this instance the agent suggests that less than 10% of the sales from the operation would be from sales to members of the public (use class E) and therefore the proposed development would be in accordance with Policy DM2.3 of the Local Plan.

1.19 The proposed development would support economic prosperity and job growth in the Borough supporting Policy S2.1 of the Local Plan and would be supporting business investment of a nature congruent to the allocated employment site.

1.20 Conclusion:

1.21 The proposed development would support sustainable economic prosperity in the Borough. The proposed development would be in accordance with Policy DM2.3 and support Policy S2.2 and S2.1 of the Local Plan (2017). A condition to limit the ancillary sales area of the site to no more than 10% would be advised to ensure the general retail sales element of the development remains ancillary.

3.0 External Consultees

3.1 Northumbria Police

3.2 We have no objections to the proposals, however we would like to make the following comments:

Builders Merchants can be a target for theft, as generally once the store is closed there is limited informal surveillance as per the proposed site layout plan, products are left in situ outside and often placed up against the fence line making them an easy target for theft.

Can it be clarified as to the height and specification of the perimeter fence, from looking at the site on Google Maps, there appears to be a mix of palisade and welded mesh fencing. Where a crime risks dictates there is a realistic chance of theft, I would recommend welded mesh fencing with a height of 2.4m for this boundary treatment.

From the proposed site layout out, there are a number of pallet and cantilever racking systems, these should be located away from the perimeter fence which would deter and help prevent them being used as a climbing aid and the products being an easy target for theft.

A general security plan should be developed and adopted for the site, to include external lighting, comprehensive CCTV and overall site security operating procedures, such as gate security and general maintenance of the site to include regular checks of the boundary fence.

3.3 Newcastle International Airport Limited (NIAL)

3.4 No comments.

3.5 Tyne and Wear Archaeology Officer

3.6 I have checked the site against the HER and historic maps, and consider that the proposals will not have a significant impact on any known archaeological heritage assets, and no archaeological work is required.
